

# NumBugz<sup>®</sup> Rules

## Sequenz

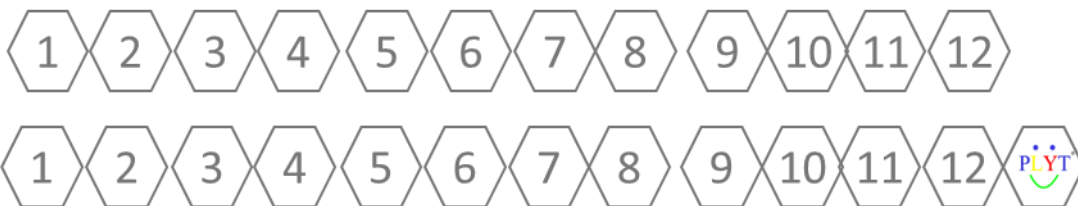

Sequenz is a very quick game designed primarily to help young players understand number sequences

**Aim of the game:** To create a chain of Bugz in the right sequential order

**Players:** A single player game or a speed challenge for up to 6 players

**Starting the game:** Each player places a full set of Bugz, Bugz face up in front of them. The pieces are moved around so they are randomly scattered. On the turn of the timer (a single player game) or on the shout of "Bugz", the players attempt to create a Sequenz chain from 1 to 12 with a PLYT Bug at the end as fast as possible.

**Winning the game:** In a speed challenge, the player creating the fastest Sequenz, wins the game. For a single player, the challenge is to beat the timer.
