## SumBugz

SumBugz is a very quick, fun guessing game

**Aim of the game:** To predict the total value of the Bugz in the Hand

**Players:** Can be played by 2 people, but better with 3 or more and you can play with an almost unlimited number of players

**Starting the game:** All the Bugz start in the Bugz Bag. Each player randomly pulls a Bug from the Bag and the player with the highest number goes first.

**Playing a Round:** The first player chooses how many Bugz each player should take from the Bag – all players must take the same number of Bugz up to a maximum of 5. All players randomly take that number of Bugz from the Bag, flip them to look at the numbers without anyone else seeing, then hold them out in front of them, hidden in their Hand.

The first player then predicts the total value of all the Bugz held in the players' Hands and shouts it out loud. Play then moves clockwise until all players have made a prediction. Players are not allowed to make the same prediction as an opponent.

**Winning a Round:** The Bugz are then flipped, added up and the player with the closest prediction to the total wins the round. A PLYT Bug counts as 13. All the used Bugz are then returned to the Bag, except for one which the winner adds to their Pot.

In the event of a tie, the tied players both add a Bug to their own Pot.

The winner of the round then becomes the "first player" for the next round. Play then continues as per the first round.

**Winning the game:** The first player to reach a total of 5 Bugz in their Pot wins the game
